Old Business

Shell Building Status Update:

Krista Linke reported that Runnebohm is working with Veridus to get the topography for the site. This is needed because there is a question regarding the location of the road entrance due to visibility concerns on the north end of the property. There is a potential to have the entrance at the south end of the property off of Graham Road, but that would take cooperation from the south property owner because they already have an entrance off of Graham Road and the two entrances would need to be combined into one. There are talks with the neighbor in order to make that happen. Mr. Deppe asked the amount of acreage. It's 14 acres. Chris King reported the topo is complete. Runnebohm will get with City Engineer Travis Underhill to decide the best entrance location. Mr. Heuchan mentioned the platting process that needs to take place. Mr. King reported a spring startup.
